response to nitrate

cell wall biogenesis

cell wall polysaccharide biosynthetic process

cell wall macromolecule biosynthetic process

glucuronoxylan metabolic process

cellular component macromolecule biosynthetic process

hemicellulose metabolic process

xylan metabolic process

xylan biosynthetic process

induced systemic resistance

indole glucosinolate metabolic process

Cluster cluster1

cluster4

cluster7 cluster8

jasmonic acid mediated signaling pathway

salicylic acid mediated signaling pathway

systemic acquired resistance, salicylic acid mediated signaling pathway

benzene-containing compound metabolic process

systemic acquired resistance

cellular response to salicylic acid stimulus

cellular response to jasmonic acid stimulus

response to hypoxia cellular response to organic cyclic compound

cellular response to hypoxia response to salicylic acid

response to decreased oxygen levels

cellular response to antibiotic

cellular response to drug

response to oxygen levels cellular response to oxygen levels

cellular response to decreased oxygen levels
